DeAndre, per the request below, here is the information pertaining to West Lake:

-Airborne ASPECT, INC was the contractor. We used the ASPECT airplane once and only once in FY2013 to overfly West Lake Landfill in Bridgeton, St. Louis County, MO. Cost \$19,559.07. This work was not associated with any enforcement actions.

Principles and integrity are expensive, but they are among the very few things worth having.

All-

The FY 2014 Appropriations bill included report language requiring the agency to provide information to the House and Senate Appropriations Committees on piloted overflights as part of the compliance monitoring program. In order to prepare the report, OECA needs certain data from the regions. Specifically, please provide **the following data for your division for each year between FY 2003 to FY 2013:**

∇ The amount of funding spent to contract for aerial over-flights by fiscal year (this should cover region-only funding; any overflights funded by OECA/OCE are being provided by OCE)

∇ The contractor performing the work

∇ The number of flights performed by fiscal year

∇ Geographical areas (county and State) that the contracted flights surveyed

∇ Data that identifies by fiscal year the number of enforcement actions where aerial survey information was utilized as contributing evidence, and the outcome of each action

If the information is not available because it is not tracked, please note that as your response. Also let me know if your division has not performed aerial over-flights for the period indicated.

Please provide the requested information to me by COB Wednesday, June 25, 2014. I will compile and send the response for Region 7.

Thanks.
